EXPERIENCE

Cypress.io, Atlanta, GA— *Success Engineer*

MAY 2020 - PRESENT

I coach and provide support to Engineering teams to integrate Cypress tests into their SDLC. I troubleshoot reproducible issues in my own sandbox applications to provide test case examples that others can implement.

Kabbage, Atlanta, GA— *Software Engineer In Test*

NOV 2019 - MAY 2020

I wrote and maintained the automated API tests using Jest and e2e tests using Protractor (written in Typescript) for Kabbage's newest invoicing and payment features.

Gather, Atlanta, GA — *QA & Client Support Engineer*

OCT 2017 - NOV 2019

I wrote automated tests in Cypress.io to increase our ratio of automated test coverage vs manual. When I saw a problem I could solve with automation, I tried to build solutions to present as POCs:

- To identify data discrepancies between our NoSQL data store and our SQL database, I wrote a script that reports differences to the dev team.
- I built a custom slack-bot for team members across the business to get answers to technical questions themselves from Confluence.
- I automated test suite creation triggered by pull requests via JIRA API

Variance Reduction International, Atlanta, GA— *Web Developer, Contractor*

JULY 2017 - OCT 2017

I worked on a small project team building a contractor management platform for the human resources team at an international management consultancy firm. I worked on the Rails API as well as the React front-end.

EDUCATION

General Assembly, Atlanta, GA — *Web Development Immersive*

FEB 2017 - MAY 2017

This 12-week program focuses on the fundamentals of programming and full-stack web development. It taught me how to learn.

Georgia State University, Atlanta, GA — B.S. *Film & Video*

2007 - 2012

Minor in Hospitality Administration - Fairs, Festivals, and Expositions
